CALICO PRINTING.—On Saturday we Printing establishment of Messrs J. L. Stifel & Sons. The process of coloring by a farmer residing in the vicinity and printing the cloths is very interestferent from what we had supposed, requiring on the part of the manager a display of science and skill far beyond what we had heretofore thought necessary for the prosecution of the business. The younger Mr. Stifel who showed us through their establishment, and explained the operations of dyeing and business, well versed in the science of father, have succeeded in establishing for their goods a high reputation in all the markets of the country. They have devoted their attention almost entirely to the production of that particular class of goods known as domestic blues, in this branch they now excel, and their prints are in such great request that says: the Eastern jobbing houses send their cloths to the Messrs. Stifel to be printed, and from here have them shipped direct to their western customers. Mr. J. L. Stifel the senior member of the firm, started the business in Wheeling Virginia regiments, that distinguished in 1835. At first he encountered all the themselves on many hard-fought fields, both difficulties peculiar to new enterprises, and which surround and harass a new beginner, competing with heavy capidal and old establishments. At first he found difficulty in disposing of his goods even by scattering them around among the country stores on commission, but by persevering industry, and the production of a superior article, finally overcame all obstacles, and has established a most successful trade. He no longer finds it necessary to go abroad to sell. His customers now seek the goods, and make their purchases at the The business for some time past has

The printing machine is worked by hand but is very rapid in its operadred yards per hour. After remaining a few hours to dry the cloth is wound upon reels which are suspended over the drying vats into which they are lowered and raised by a small windlass. The principal and most costly ingredient used in the coloring is the Indigo. The grinding of this article is laborious and tedious, no mill having yet been found which answers the purpose, owing to its gummy nature. The reels on which the cloth has been wound are lowered into the vats remaining immersed about thirty minutes when they are raised and remain exposed to the air for some fifteen minutes. This exposure reoxoydizes the indigo in the cloth and produces the desired colors. From five to seven dips are sufficient to complete the coloring operation. The cloth is then dried and again washed and dried, after which it is bolted and pressed, and the prints are ready for

The color of the figures in these prints | Berler Michael W is generally white or light blue on deep blue ground. Other colors are also produced, such as green, yellow and orange. The two first, however, are those most generally desired. These colors can be printed at once on the ma-chine used by this firm. These gentle-men also manufacture their own patterns, a work which requires consider able taste and much mechanical skill. Visitors will also find at Mr. Stifel's specimens of colors, dye stuffs, produced from the residuum of coal tar and coal oil. These are known under the gen-eral head of Amaline. Mr. Stifel, however, does not consider them as adapted to his business, but better suited for silks and fancy goods.

MUNICIPAL COURT,—We understand that some business was done on Saturday. Two men for forestalling the Dulley Martin C day. Two men for forestalling the Darbey Mr. assault \$20 and costs; one for selling liquor to soldiers \$20 and costs. There may possibly have been some other may possibly have been some other cases disposed of in the afternoon which have not been reported.

FUNERAL OF A SOLDIER. John R. French, son of Mr. John French of this city, was killed in the battle of New Market, fought on the 15th day of May, 1664. He was a member of Battery D and a brave and tried soldier. Our spent a very pleasant hourin the Calico troops being worsted in the engagement his body was left on the field and buried On returning up the valley a few weeks ing, and in many particulars, quite difhis grave and marked it, also erecting a head-board bearing the name of the deceased. On Friday evening last Mr. John Mendel, a friend of the family, returned from a trip up the Valley bringing with him the remains of the gallant soldier. They were taken to his father's residence on Eoff street, where printing, are thorough masters of the noon, when they were interred in Mount chemistry, and the art of producing tended by the late members of Battery D, and a large number of friends and citizens. Young French was a man of much promise, greatly beloved by his friends and comrades, who deeply lament his loss.

THE SECOND WEST VIRGINIA VET-ERANS.—The Clarksburg Telegraph

The brave fellows composing this regiment have been recently stationed in the adjoining counties to this place with the headquarters of the command-er, Lieut.-Col. Weddle, at Clarksburg. This regiment is composed of the re-enlisted men of the 1st and 4th West on Tuesday just as the men had pre-pared for embarking on the train for Parkersburg an order-was received to prepare their papers for mustering out. They will return to their peaceful homes in a few days, and we are rejoiced that it is the case. IF DIRECTIONS ARE FOLLOWED, 1857 Call for Circular describing all symptoms

SYMPTOMS: THE SYMPTOMS OF CATARRH AS

THE SYMPTOMS OF CATARRH AS they generally appear are at first very slight. Persons find they have a cold, that they have frequent attacks, and are more sensitive to the changes of temperature. In this condition, the nose may be dry, or a slight discharge, thin and acrid, afterwards becoming thick and adhesive. As the disease becomes chronic, the discharges are increased in quantity and changed in quality; they are now thick and heavy, and are hawked or coughed off. The secretions are offensive, causing a bad breath; the voice is thick and nasal, the eyes are weak; the sense of the smell is lessened or destroyed; deafness frequently takes place. Another common and important symtom of Catarrh is that the person is obliged to clear his throat in the morning of a thick or slimy mucus, which has fallen down from the head during the night. When this takes place the person may be sure that his disease is on its way to the lungs, and should lose no time in arresting it.

The above are but few of the many Catarrh rresting it. The above are but few of the many Catarrh
